

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

consists of 35 titles of papers by the late Marquis of Tweeddale, all but one published during the years 1867-1881, with 15 additional titles of papers by other authors. The annotations show very fully the bearing of the papers cited upon Philippine ornithology.—J. A. A.

Marble on Birds of New Hampshire.¹ — This is a privately printed list of 92 species, given under vernacular names. It contains many records of interest and forms an apparently trustworthy summary of the birds occurring at Crawford's during the breeding season. As the title indicates, it is based on five years' observations.—J. A. A.

Reed's 'Bird Guide.'² — In this attractive little work each species is illustrated in color, the figure and the text occupying a single page. The text is biographical, describing the range of the species, its notes, and nesting habits. The colored figures, with the 'Field Key' at the end of the book, afford the means of identification. The illustrations (wash drawings, colored) are surprisingly adequate considering their cost, and will greatly aid amateurs in recognizing the birds they meet with in life. As a 'Bird Guide' it is truly *multum in parvo*.—J. A. A.

Cherrie on New Birds from the Orinoco Region and Trinidad.³ — The new species and subspecies are, (1) *Formicivora canofumosus*, from the Orinoco; (2) *Planesticus fumigatus aquilonalis*, from Trinidad; (3) *Pachyrhamphus marcidus*, from the Orinoco; (4) *Anoplops rufigula*, from the Caura River, Venezuela. A new genus is *Inezia*; type, *Capsiempis caudata* Salvin.—J. A. A.

Miller's Experiment in the Colonization of the House Martin.⁴ — The experiment consisted in taking on July 14, 1908, five young birds from Portland to Shawnee, nine miles distant on the Delaware River in Pennsylvania. The birds, just able to fly, were successfully reared by hand. One of the birds, escaping on the fourth day after they were transferred to their new home, flew away and did not return to the home but was repeatedly seen in the neighborhood associating with Barn Swallows.

¹ A | List of Birds | Found within a radius of one mile from | the Crawford House, N. H., | in July, August and September, | during the past five years. | By | Richard Merrill Marble. | September, 1907.— Privately printed, 8vo, pp. 8.

² Bird Guide. Part 2. Land Birds east of the Rockies, from Parrots to Bluebirds. By Chester A. Reed. Charles K. Reed, Worcester, Mass., 1909. 3½ by 5½ inches, pp. 1-223 + index. Cloth, 75 cents; in flexible leather, \$1.00.

³ New Birds from the Orinoco Region and from Trinidad. By Geo. K. Cherrie. Science Bulletin, Brooklyn Institute of Arts and Sciences, Vol. I, No. 16, pp. 387-390. Issued June 30, 1909.

⁴ An Experiment in the Colonization of the House Martin. By Charles W. Miller, Worthington Society for the Study of Bird Life, Bulletin No. 1, Jan., 1909. 8vo, pp. 12, and 4 half-tone plates.
